# GUGLIELMI INTRODUCES TUTTUNO

Year 2019  
HORECA INTERNATIONAL

Guglielmi Sp.A. introduces its flagship to the catering and HORECA world : the TUTTUNO kitchen mixer that - as the name suggests - integrates 5 functions in a single tap. It is an absolute brand new for the kitchen ambiance that sees as main character an all-in-one mixer capable of providing FILTERED WATER from a single aerator, removing chlorine, limestone residues and unpleasant tastes and bad smells, generating pure water ready to drink. Furthermore, through the control simple rotation, you are immediately provided with chilled filtered water, chilled sparkling water and hot water (98°).

TUTTUNO belongs to PURA Collection - Spring water, a wide range of products entirely conceived and developed to zero the accretion of plastic bottles and reduce their pollution. Every year more than 22 BILLION plastic bottles are bought, brought home, emptied and finally thrown away. All PURA models remove these passages improving the quality of life, optimizing the kitchen spaces and saving both time and efforts.

TUTTUNO size is minimal. The filtration, carbonation, chiller and boiler system takes the space of a six-bottle water box. The Pura models stand for a considerable alternative to the traditional taps in the restaurant world, an ally for the best chefs, bars and clubs that may optimize both time and work, improving the flavor of drinks and best recipes.
